Work Experience

Graphic Designer @ fantfolks, Bangalore

Aug 2022 - Present (6 months) | Semi-fulltime

- The project assigned was to create the design of website which would be easy for the user to understand and creating creative illustrations for them.
- The contribution from my part was creating the wireframe and user interface of the website and also creating different creative illustrations used in the project.
- The project features a platform which showcase our skills in different fields using which the customer can hire people as freelancers.

Skills Developed: UI Design, Illustrator, Figma

Team Members: Ayush Agrawal (Website Developer)

Projects

Stationary UI

- The goal of project was to design an application for an online stationary store.
- While creating the project more importance was given to an eye catching color combination and keeping a simple design best for the user to use
- The interface have been kept to minimum elements yet all functions as not to confuse the user.

Skills Developed: Figma, AdobeXD, Illustrator

fantfolks

- The goal of this project was to create a website for applying for freelancing opportunities.
- The project had logo creation and wireframe designing illustrations and developement skills to develop this website.
- The website has less number of components keeping the interface simple and easy to understand

Skills Developed: Illustrator, Logos, Wordpress, Figma

Shopy

- An online platform to buy every item possible like a shopping mart having all items at one place.
- The project deals with creating front-end as well as backend structure.
- The products will be listed at one place keeping it easier for the customer to browse through the items they want.
